

Easy to use software plus FREE farm map

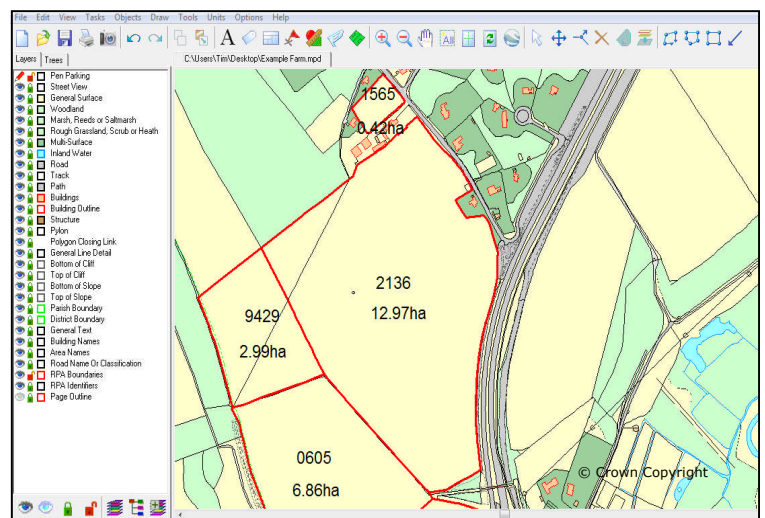

We can help you obtain free electronic copies of your Single Farm Payment Scheme maps from the relevant Government agency. Using our **PT-Mapper** mapping program, these can be overlaid on a free Ordnance Survey background map so that you have the benefit of accurate field boundaries plus a map showing your farm in the context of surrounding roads, buildings, water courses.

PT-Mapper has been designed specifically for farming, forestry and estate management. Easy to use, it enables you to measure areas and distances at a glance, prepare waste management, soil management, ELS, HLS plans, show cropping plans, show and measure field margins, print whole maps or part maps at any scale — in fact, anything that you would want to do with a paper map, PT-Mapper will let you do more accurately, faster and with much greater versatility.

For a fixed one-time payment, regardless of farm size, Pear Technology will provide you with an accurate farm map showing parcel boundaries, numbers, areas superimposed on a contextual background map, ready for immediate use with the PT-Mapper software so that you can view, edit, print the map as you wish. You can save any number of versions of your map.

Typical Applications

- Plotting water pipe and other services.
- Showing cropping plans.
- Producing maps for visitors, staff, contractors.
- Preparing waste management plans.
- Adding map data from GPS devices.
- Switching between aerial image and map.
- Planning applications.
- Emailing maps.
- Accurate measurement of areas and distances.
- Preparation of ELS/HLS/Stewardships/Woodland Grant Schemes.
- Linking to Pear's Fieldman crop recording system.
